About the Programme

It is an established fact that science progresses with new research, and research accessibility. To advancing scientific knowledge further exploration require good scientific research communication in the form of scholarly publications such as research papers. Thus, writing good research papers becomes crucial. Therefore, organizing a workshop cum training session on 'writing and citing good scientific papers' shall be important for researchers for several reasons. It enhances research skills, ensuring clarity and precision in conveying findings, research and institutional visibility, leading to national and international research collaboration and communication, benefitting both researchers and institutions. Further, it may help the researchers in understanding publication guidelines and nitty-gritty of publishing, thereby increasing the chances of paper's acceptance for publication, enhance their citations and citation metrics which also aid in career advancement.
